### **RULING ON ENTITLEMENT**<sup>1</sup>

On September 11, 2020, Jody Caldwell filed a petition for compensation under the National Vaccine Injury Compensation Program, 42 U.S.C. §300aa-10, *et seq.*<sup>2</sup> (the “Vaccine Act”). Petitioner alleges that she suffered a left shoulder injury related to vaccine administration (“SIRVA”) as a result of an influenza vaccine received on September 13, 2017. Petition at 1. Petitioner further alleges the vaccine was administered in the United States, no previous civil action has been filed and no one has previously collected an award or settlement of a civil action for damages arising from her alleged vaccine-related injuries, and she suffered residual effects of her injury for more than six months. Petition at ¶¶ 2, 11, 49-106. The case was assigned to the Special Processing Unit of the Office of Special Masters.

On February 15, 2022, Respondent filed his Rule 4(c) report in which he concedes that Petitioner is entitled to compensation in this case. Respondent's Rule 4(c) Report at 1. Specifically, Respondent agrees that "petitioner has satisfied the criteria for SIRVA set forth in the Vaccine Injury Table and the Qualifications and Aids to Interpretation, which afford petitioner the presumption of causation, because petitioner had no history of pain, inflammation, or dysfunction in her left shoulder; her pain occurred within 48 hours of receipt of an intramuscular vaccination; her pain and reduced range of motion were limited to the shoulder in which the vaccine was administered; and no other condition or abnormality was identified to explain her symptoms." *Id.* at 10. Respondent further agrees that the statutory six month sequela requirement has been satisfied. *Id.*

**In view of Respondent's position and the evidence of record, I find that Petitioner is entitled to compensation.**
