RULING ON ENTITLEMENT¹

On November 18, 2022, Robert Moore filed a petition for compensation under the National Vaccine Injury Compensation Program, 42 U.S.C. §300aa-10, *et seq.*² (the “Vaccine Act”). Petitioner alleges that he suffered a shoulder injury related to vaccine administration (“SIRVA”) following an influenza vaccination he received on September 30, 2021. Petition at 1. Petitioner further alleges he has suffered the residual effects of his vaccine injury for more than six months. Petition at ¶ 11. The case was assigned to the Special Processing Unit of the Office of Special Masters.

On January 26, 2024, Respondent filed his Rule 4(c) report in which he concedes that Petitioner is entitled to compensation in this case. Respondent’s Rule 4(c) Report at

1. Respondent states that “Petitioner’s alleged injury is consistent with SIRVA as defined by the Vaccine Injury Table. Specifically, Petitioner had no history of pain, inflammation, or dysfunction of his left shoulder prior to vaccination; pain occurred within 48 hours after receipt of an intramuscular vaccination; pain was limited to the shoulder in which the vaccine was administered; and no other condition or abnormality has been identified to explain Petitioner’s shoulder pain.” *Id.* at 5. Respondent further agrees that “Petitioner has satisfied all legal prerequisites for compensation under the Act.” *Id.*

In view of Respondent’s position and the evidence of record, I find that Petitioner is entitled to compensation.

IT IS SO ORDERED.
