RULING ON ENTITLEMENT¹

On February 8, 2024, William Brimmer, II filed a petition for compensation under the National Vaccine Injury Compensation Program, 42 U.S.C. §300aa-10, *et seq.*² (the “Vaccine Act”). Petitioner alleges that he suffered Guillain-Barré syndrome (“GBS”) resulting from an influenza (“flu”) vaccine received on October 21, 2022. Petition at 1. Petitioner further alleges that the vaccine was administered in the United States, his injury lasted longer than six months, and neither Petitioner, nor any other party, has ever received compensation in the form of an award or settlement for Petitioner’s vaccine-related injury. Petition at ¶¶ 1, 11, 12. The case was assigned to the Special Processing Unit of the Office of Special Masters.

If, upon review, I agree that the identified material fits within this definition, I will redact such material from public access.

² National Childhood Vaccine Injury Act of 1986, Pub. L. No. 99-660, 100 Stat. 3755. Hereinafter, for ease of citation, all section references to the Vaccine Act will be to the pertinent subparagraph of 42 U.S.C. § 300aa (2018).

On October 25, 2024, Respondent filed his Rule 4(c) report in which he concedes that Petitioner is entitled to compensation in this case. Respondent's Rule 4(c) Report at 1. Specifically, Respondent agrees that "petitioner suffered GBS following a flu vaccine within the Table time period, and there is not a preponderance of the medical evidence that petitioner's GBS was due to a factor unrelated to the vaccination." *Id.* at 7. Respondent further agrees that the claim satisfies the statutory severity requirement in that Petitioner experienced sequelae of his GBS for more than six months, and Petitioner has satisfied all legal prerequisites for compensation under the Vaccine Act and thus compensation is appropriate. *Id.*

In view of Respondent's position and the evidence of record, I find that Petitioner is entitled to compensation.

IT IS SO ORDERED.
