**RULING ON ENTITLEMENT<sup>1</sup>**

On October 7, 2024, Sara Primus filed a petition for compensation under the National Vaccine Injury Compensation Program, 42 U.S.C. §300aa-10, *et seq.*<sup>2</sup> (the “Vaccine Act”). Petitioner alleges that she suffered a shoulder injury related to vaccine administration (“SIRVA”) following a HPV vaccination she received on October 3, 2023. Petition at 1. Petitioner further alleges that her symptoms “lasted for more than six (6) months.” *Id.* The case was assigned to the Special Processing Unit of the Office of Special Masters.

On June 9, 2025, Respondent filed his Rule 4(c) report in which he concedes that Petitioner is entitled to compensation in this case. Respondent’s Rule 4(c) Report at 1.

Respondent states that “Petitioner’s alleged injury is consistent with SIRVA as defined by the Vaccine Injury Table. Specifically, Petitioner had no history of pain, inflammation, or dysfunction of her left shoulder prior to vaccination; pain occurred within forty-eight hours after receipt of an intramuscular vaccination; pain and reduced ROM were limited to the shoulder in which the vaccinations were administered; and no other condition or abnormality has been identified to explain Petitioner’s left shoulder pain.” *Id.* at 3-4. Respondent further agrees that “based on the record as it now stands, Petitioner has satisfied all legal prerequisites for compensation under the Vaccine Act.” *Id.* at 4.

**In view of Respondent’s position and the evidence of record, I find that Petitioner is entitled to compensation.**

**IT IS SO ORDERED.**
